

WS Tech – JavaScript Functions & NPM Lab Questions

Section 1: JavaScript Functions (Node.js)

- 1 Write a function greet(name) that prints 'Hello ' in the console.
- 2 Create a function add(a, b) that returns the sum of two numbers.
- 3 Write a function isEven(num) that returns true if the number is even.
- 4 Create a function square(n) that returns the square of a number.
- 5 Write a function calculateAverage(a, b, c) that returns the average of three numbers.
- 6 Create a function printNumbers() that prints numbers from 1 to 10.
- 7 Write a function findMax(a, b) that returns the largest number.
- 8 Create an arrow function multiply(a, b) that returns multiplication result.

Section 2: NPM Practice

- 1 Create a new Node.js project folder and run npm init -y.
- 2 Open package.json and identify name, version, and scripts section.
- 3 Add a start script in package.json to run app.js.
- 4 Install the chalk package using npm install chalk.
- 5 Write a program that prints colored text using chalk.
- 6 Check dependencies added inside package.json.
- 7 Explain what node_modules folder contains.
- 8 Uninstall chalk using npm uninstall chalk.

Submission: Submit app.js and package.json in a folder named WS_Tech_Function_NPM_StudentName.
